

# Readmission Report

## User Tutorial

How to use the Readmission Report on CHS.care

Version: 1.0

Last Updated: January 2026

Author: Eli Keller / Data Team

CHS.care

# Report Overview & Key Benefits

The screenshot shows the CHS Care Readmission Report interface. At the top, there are dropdown menus for Division (All), Region (All), Facility (Pebble Creek), Payer (All), and a date range from 10/08/2025 to 01/05/2026. Below the header are three main scenario-based rollup tables:

- READMISSIONS FROM HOSPITAL AFTER ENTRY FROM HOSPITAL:**

| Stay Length      | <=0HH | 2-5 | 6-7 | 8-14 | 15-30 | 31-100 | >100 | Total |
|------------------|-------|-----|-----|------|-------|--------|------|-------|
| Stays            | 3     | 5   | 13  | 9    | 2     | 5      | 1    | 34    |
| %                | 2%    | 3%  | 6%  | 5%   | 4%    | 3%     | 1%   | 8%    |
| Cumulative stays | 3     | 8   | 21  | 30   | 37    | 52     | 53   | 126   |
| %                | 2%    | 5%  | 12% | 17%  | 21%   | 24%    | 32%  | 100%  |
- READMISSIONS FROM HOSPITAL AFTER DISCHARGE TO HOSPITAL:**

| Absence Length   | <=0HH | 2-5 | 6-7 | 8-14 | 15-30 | 31-100 | >100 | Total |
|------------------|-------|-----|-----|------|-------|--------|------|-------|
| Stays            | 1     | 8   | 22  | 2    | 5     | 0      | 0    | 37    |
| %                | 2%    | 14% | 39% | 12%  | 9%    | 0%     | 0%   | 100%  |
| Cumulative stays | 1     | 2   | 31  | 33   | 43    | 43     | 43   | 126   |
| %                | 2%    | 16% | 54% | 67%  | 75%   | 75%    | 75%  | 100%  |
- READMISSIONS FROM HOSPITAL AFTER DISCHARGE TO COMMUNITY:**

| Absence Length   | <=0HH | 2-5 | 6-7 | 8-14 | 15-30 | 31-100 | >100 | Total |
|------------------|-------|-----|-----|------|-------|--------|------|-------|
| Stays            | 0     | 0   | 2   | 2    | 4     | 0      | 0    | 10    |
| %                | 0%    | 0%  | 0%  | 4%   | 2%    | 0%     | 0%   | 100%  |
| Cumulative stays | 0     | 0   | 2   | 4    | 6     | 10     | 10   | 10    |
| %                | 0%    | 0%  | 0%  | 4%   | 6%    | 10%    | 10%  | 100%  |

At the bottom of the report, there are links for Help/Support and a note about data accuracy, along with a powered by DatAlign logo.

## What this report offers:

The Readmission Report summarizes hospital-related SNF stays and returns for SNF residents. It shows how often residents:

- Are readmitted to the hospital after entering from a hospital, and
- Return to the SNF after a hospital stay, either after being discharged to the hospital or discharged to the community,

with each scenario organized into length-of-stay or length-of-absence buckets.

Alongside these three scenario tables, the report includes a Stays Grouped by Falls and Diagnoses table that shows how all qualifying stays in the selected period are distributed across diagnosis categories and fall events, using the same time buckets.

You can limit the view by division, region, facility, payer type, and date range, and you can drill down from any number in the summary tables to see the underlying resident-level stays.

## How the data is presented:

- **Rollup Tables**
  - Three scenario-based rollup tables with counts of qualifying stays
  - One stay-based table with key diagnoses and counts of falls by severity
- **Detail modal (resident-level drill down)**
  - Searchable, sortable table with resident and stay details

**READEMISSIONS TO HOSPITAL AFTER ENTRY FROM HOSPITAL**

Readmissions To Hospital After Entry From Hospital

This table displays counts of all stays in which the resident entered from hospital and was discharged to a hospital.

**15-30** **31-100** **>100**

|     |     |     |
|-----|-----|-----|
| 4   | 7   | 5   |
| 9%  | 16% | 12% |
| 10  | 17  | 22  |
| 23% | 40% | 51% |

**<=30 Days: 10 ( 23%)**

**Total entries from hospital: 43**

## Area Description

Division, Region, Facility, and Payers filters used to focus the report on specific parts of the organization and payer types.

Discharge In Range / Entry In Range toggle, Start Date, End Date, and Submit button used to define the date window and whether stays are included based on entry date or discharge date.

Three scenario-based tables summarizing counts of qualifying stays and returns, organized into length-of-stay or length-of-absence buckets.

Table showing counts of qualifying stays by diagnosis and falls categories, using the same time buckets as the scenario tables.

# Scenario tables

## Step by Step Walkthrough

| READMISSIONS TO HOSPITAL AFTER ENTRY FROM HOSPITAL |      |     |     |   |       |        | ?     |
|--|------|-----|-----|---|-------|--------|-------|
| Stay Length  | <24H | 2-3 | 4-7 | 8-14                                      | 15-30 | 31-100 | >100  |
| Stays  | 114  | 157 | 233 | 300                                       | 417   | 539    | 740   |
| %  | 2%   | 3%  | 4%  | 5%  | 7%    | 9%     | 12%   |
| Cumulative stays                                   | 114  | 271 | 504 | 804                                       | 1,221 | 1,760  | 2,500 |
| %  | 2%   | 5%  | 8%  | 14%                                       | 21%   | 30%    | 42%   |
| <=30 Days: 1,221 ( 21%)                            |      |     |     | Total entries from hospital: <u>5,936</u> |       |        |       |

| REENTRIES FROM HOSPITAL AFTER DISCHARGE TO HOSPITAL |      |     |       |       |       |        | ?     |
|---|------|-----|-------|-------|-------|--------|-------|
| Absence Length                                      | <24H | 2-3 | 4-7   | 8-14  | 15-30 | 31-100 | >100  |
| Stays   | 121  | 560 | 773   | 360   | 124   | 16     | 0     |
| %   | 4%   | 20% | 28%   | 13%   | 4%    | 1%     | 0%    |
| Cumulative stays                                    | 121  | 681 | 1,454 | 1,814 | 1,938 | 1,954  | 1,954 |
| %   | 4%   | 24% | 52%   | 65%   | 69%   | 70%    | 70%   |
| Total discharges to hospital: <u>2,795</u>          |      |     |       |       |       |        |       |

| REENTRIES FROM HOSPITAL AFTER DISCHARGE TO COMMUNITY |      |     |     |      |       |        | ?    |
|--|------|-----|-----|------|-------|--------|------|
| Absence Length                                       | <24H | 2-3 | 4-7 | 8-14 | 15-30 | 31-100 | >100 |
| Stays  | 1    | 5   | 19  | 28   | 35    | 32     | 0    |
| %  | 0%   | 0%  | 1%  | 1%   | 1%    | 1%     | 0%   |
| Cumulative stays                                     | 1    | 6   | 25  | 53   | 88    | 120    | 120  |
| %  | 0%   | 0%  | 1%  | 2%   | 3%    | 5%     | 5%   |
| Total discharges to community: <u>2,625</u>          |      |     |     |      |       |        |      |

Figure 4: Scenario tables

## Using the Scenario tables

- Use the three scenario tables to see how stays are distributed across:
  - Readmissions to hospital after entry from hospital
  - Reentries from hospital after discharge to hospital
  - Reentries from hospital after discharge to community
- Read across the columns to view stays by length-of-stay or length-of-absence bucket.
- Use the rows to understand the numbers:
  - Stays – the count of stays that fall only in that time bucket.
  - Cumulative stays – a running total of stays up to and including that bucket:
    - Each bucket adds on to the buckets to its left.
    - For example, the 8-14 day cumulative value includes stays in ≤24H, 2-3, 4-7, and 8-14 days.
    - The final Total column's cumulative value represents all qualifying stays (100%).
  - Denominator – the total number of qualifying stays used when calculating percentages for that scenario.
- Practical use of cumulative
  - To answer questions like "What share of stays returned within 30 days?", look at the Cumulative stays value under the last bucket in that window (for example, 15-30 days or the ≤30 Days line in the first scenario table).
- Drill down to details
  - Click any number in these tables to open the detail modal for that scenario and time bucket.

# Stays Grouped by Falls and Diagnoses

## Step by Step Walkthrough

STAYS GROUPED BY FALLS AND DIAGNOSES

| Stay Length        | <=24H | 2-3 | 4-7 | 8-14 | 15-30 | 31-100 | >100 | Total |
|--------------------|-------|-----|-----|------|-------|--------|------|-------|
| Falls No Injury    | 6     | 12  | 38  | 57   | 141   | 233    | 189  | 676   |
| %                  | 0%    | 0%  | 1%  | 1%   | 2%    | 3%     | 3%   | 10%   |
| Falls Major Injury | 1     | 0   | 5   | 2    | 10    | 25     | 58   | 102   |
| %                  | 0%    | 0%  | 0%  | 0%   | 0%    | 0%     | 1%   | 2%    |
| Falls Minor Injury | 4     | 11  | 17  | 16   | 55    | 84     | 97   | 284   |
| %                  | 0%    | 0%  | 0%  | 0%   | 1%    | 1%     | 1%   | 4%    |
| Hip Fracture       | 0     | 0   | 2   | 1    | 1     | 1      | 0    | 10    |
| %                  | 0%    | 0%  | 0%  | 0%   | 0%    | 0%     | 0%   | 0%    |
| Other Fracture     | 0     | 4   | 6   | 1    | 0     | 2      | 2    | 15    |
| %                  | 0%    | 0%  | 0%  | 0%   | 0%    | 0%     | 0%   | 0%    |
| CAD / MI           | 5     | 15  | 24  | 3    | 1     | 6      | 8    | 62    |
| %                  | 0%    | 0%  | 0%  | 0%   | 0%    | 0%     | 0%   | 1%    |
| Heart Failure      | 7     | 18  | 26  | 3    | 2     | 5      | 9    | 70    |
| %                  | 0%    | 0%  | 0%  | 0%   | 0%    | 0%     | 0%   | 1%    |
| Pneumonia          | 3     | 3   | 6   | 0    | 0     | 0      | 1    | 13    |
| %                  | 0%    | 0%  | 0%  | 0%   | 0%    | 0%     | 0%   | 0%    |
| Total Stays: 6,751 |       |     |     |      |       |        |      |       |

Figure 5: Stays Grouped by Falls and Diagnoses

## Stays Grouped by Falls and Diagnoses

- Use this table to see how stays are grouped by:
  - Falls category (no injury, minor injury, major injury)
  - Key diagnosis groups (e.g., CAD/MI, heart failure, pneumonia)
- Compare the columns to see how often each group appears in each time bucket, using the same buckets as the scenario tables.
- Click any number to drill down to the resident-level detail for that diagnosis or falls group and time bucket.

# Detail Modal

## Step by Step Walkthrough

Readmissions to hospital after entry from hospital, length of stay: <= 100

| Resident MRN | Resident Name        | Facility Name | Admission Date | Discharge Date | Days In Stay | Entry From | Discharge To | Payers          | Falls        |
|--------------|----------------------|---------------|----------------|----------------|--------------|------------|--------------|-----------------|--------------|
| 2314710      | Aiken, Lori          | Advanced HC   | 11/14/2025     | 12/04/2025     | 20           | Hospital   | Hospital     | Other           | No Injury    |
| 2314671      | Basilius, Angeline   | Advanced HC   | 10/13/2025     | 11/11/2025     | 29           | Hospital   | Hospital     | Medicare Part A | Minor Injury |
| 2314700      | Boulton, Bruce       | Advanced HC   | 12/24/2025     | 12/24/2025     | 1            | Hospital   | Hospital     | Medicare Part A | Major Injury |
| 2314667      | Brown, Anthony       | Advanced HC   | 12/23/2025     | 12/25/2025     | 2            | Hospital   | Hospital     | Medicare Other  | Medicaid     |
| 2314609      | Chesser, Dennis      | Advanced HC   | 09/11/2025     | 12/04/2025     | 84           | Hospital   | Hospital     | Medicare Part A | No Injury    |
| 2313876      | Clark, Richard       | Advanced HC   | 09/08/2025     | 11/02/2025     | 55           | Hospital   | Hospital     | Medicare Other  | Medicaid     |
| 2314623      | Clocksin, Patrick    | Advanced HC   | 09/15/2025     | 10/27/2025     | 42           | Hospital   | Hospital     | Medicare Other  | Medicaid     |
| 2314673      | Degoldsbury, Stacie  | Advanced HC   | 10/14/2025     | 11/01/2025     | 18           | Hospital   | Hospital     | Medicare Other  | No Injury    |
| 2314591      | Deluna, Roberto      | Advanced HC   | 09/07/2025     | 10/11/2025     | 34           | Hospital   | Hospital     | Medicaid        | No Injury    |
| 2313306      | Fletcher, Carl       | Advanced HC   | 10/15/2025     | 10/18/2025     | 3            | Hospital   | Hospital     | Medicare Other  | Medicaid     |
| 2314602      | Keller, Michael      | Advanced HC   | 09/10/2025     | 11/12/2025     | 63           | Hospital   | Hospital     | Medicare Other  | No Injury    |
| 2314716      | Lewandowski, Michael | Advanced HC   | 11/13/2025     | 12/27/2025     | 44           | Hospital   | Hospital     | Medicaid        | No Injury    |

Rows per page: 50 | Page: 1 - 17 of 17

Figure 6: Modal View

### Using the Detail Modal (resident-level drill down)

#### How to open

- Click any number in the rollup tables (scenario tables or Stays Grouped by Falls and Diagnoses).
- The modal opens scoped to that scenario or group, time bucket, and your current filters.

#### What you see

##### A resident stays table with:

- Resident MRN and Name
- Facility Name
- Admission Date
- Discharge Date
- Days in Stay
- Entry From and Discharge To
- Payer chips
- Fall indicators

#### How to search and sort

- Use the **Search** box to filter by MRN, resident name, facility, or payer.
- Click any column header to sort ascending/descending
- Use the **Rows per page** selector and page controls to move through the results.

#### How falls are displayed

- Falls are shown as color-coded by severity of fall.
- Hover over a chip to see a tooltip with the injury type.

#### How to navigate to PCC

- Click the external-link icon next to the MRN to open the resident's chart in PointClickCare in a new window/tab.

# Tips | FAQs | Troubleshooting

## Tips

- **Choose the right date range type**

- Use **Discharge In Range** when you want to see all stays that ended in the selected window (ongoing stays will not be included).
- Use **Entry In Range** when you want to see stays that started in the selected window (good for comparing to CMS's RTH ≤30 Quality Measure).

- **Always drill down to confirm the story**

- Click any number to open the Detail Modal and review the resident list before drawing conclusions or taking action.

## FAQs

**Q: What's the difference between 'Entry In Range' and 'Discharge In Range'?**

A: Entry In Range includes stays where the admission/entry date falls within the selected date range. Discharge In Range includes stays where the discharge date falls within the selected date range. The same stay may appear in different date windows depending on which option you use.

**Q: Does the Stays Grouped by Falls and Diagnoses table only show readmissions?**

A: No. It shows all qualifying stays for the selected filters and date logic, grouped by falls severity and diagnosis categories, using the same time buckets as the scenario tables.

**Q: Why do some stays show multiple payers?**

A: The **Payers** column reflects all payer types associated with the stay during the selected period. A stay can have more than one payer (for example, Medicare followed by Medicaid).

**Q: What should I do if I think a stay is misclassified?**

A. First, check the scenario description, time bucket, and range type to confirm the logic. If it still looks wrong, capture a screenshot (including filters and the number you clicked) and share it with our support team for review.

**Q: How can I quickly find a specific resident?**

A. Click any relevant number in a table to open the **Detail Modal**, then use the **Search** box to look up the resident by MRN, name, facility, or payer. You can also sort by column headers and adjust rows per page.

## Troubleshooting

**"My counts don't match another report"**

- Confirm the range type (Entry vs Discharge in Range).
- Check the Start Date / End Date and ensure the other report uses the same logic.
- Verify Division / Region / Facility / Payers filters match the population in the comparison report.

**"I don't see data for a facility I expect"**

- Make sure the Division and Region filters include that facility.
- Confirm your user permissions allow you to see that facility in this report.

**"A resident appears in more than one cell"**

- Residents can appear in different time buckets or scenarios if they have multiple qualifying stays or returns within the selected period.

**"Why is ≤30 Days different from the Total column?"**

- The ≤30 Days line in the first scenario table is a subset of the total, counting only stays where the hospitalization occurred within 30 days or less of entry.

# Support / Contact

If you encounter any issues while using this report, please use the  button at the bottom of the report page to open a support ticket.

To ensure effective assistance, please include the following with your ticket:

- A screenshot of the issue.
- A comprehensive description, including all pertinent details like the facility name, to help us understand your experience.
